Editor's Note

This guide is intended for teachers, performers, and advanced students of the euphonium. It is primarily a listing of works written especially for euphonium. Some transcriptions that are special to the euphonium are also included. These are major works transcribed specifically for euphonium, often transcribed by euphonium soloists. No annotation is given. The reader must make his or her own judgment of the merit and suitability of each work.

This listing is intended to be as comprehensive as possible. However, compiling all the euphonium literature available is an impossibly large task. Readers are invited to send information about works that should be in the guide. Suggestions may be sent to the publisher or online at www.dwerden.com/emg.
